

# Annual Mean Temperature Anomalies (in Celsius) Relative to 1950-1980 Base Period

Thing is we've known about this for like the past 30 years and...

World Bank: "substantial species extinction, extensive loss of ecosystem functioning, large risks to global and regional food security"

William Nordhaus, 1977 (c.f. CNN): "Rising seas, mass extinctions, super droughts, increased wildfires, intense hurricanes, decreased crops and fresh water"

1950-1980 Base Period
