

Casualties in the United States from Terrorism, Suicide, and Drunk-driving, 1970-2015

Drunk-driving and suicide are more deadly public bads but don't command public attention like terrorism.

Data: Global Terrorism Database (Terrorism), U.S. Department of Transportation (Drunk-driving), World Health Organization (Suicide).
Note: Terrorism casualties also include the number wounded but not killed. Drunk-driving statistics include just the number killed.
